Physics 606
<< Classical Mechanics>>

Fall 2015

Instructor: Dr. Y. H. Shih  
Office:  PHYS 310  
Telephone:  x52558 (O), x52796 (Lab.)

Lectures:  Tu Th  10:00-11:15 am  
Room:  PHYS 226

Text:  H. Goldstein  <<Classical Mechanics>> 3rd edition

References:  Marion and Thornton  <<Classical Dynamics>>  
R.A. Becker  <<Introduction to Theoretical Mechanics>>

Prerequisites:  Student should have had a standard undergraduate course in intermediate mechanics and a standard undergraduate course in mathematical physics or engineering mathematics. In particular, it will be assumed that the students understand the basic theory of ordinary differential equation and basic material about vector spaces and matrices.

Homework:  Homework due day will be noticed with the assignment. You are encouraged to discuss the problems together; however, each person should work out their assignment independently.

Grading Method:  Homework 20%, Midterm 30%, Final 50%.

Office Hours:  W 12:30-3:30 pm. I am usually in my Lab. (Rooms 010, 011) and happy to speak with you any time. Call me before your visit.
Topic Outline:

I. Newtonian mechanics and simple mechanical systems
II. Hamilton’s principle–Lagrangian and Hamiltonian dynamics
III. Central-force motion
IV. Dynamics of a system of particles
V. Motion in a noninitial reference frame
VI. Dynamics of rigid bodies
VII. Linear oscillation and coupled linear oscillations
VIII. Hamilton dynamics, canonical transformation, Poisson brackets and phase space.
IX. Mechanical waves and wave equation
X. Introduction to group theory
