

SYLLABUS

COURSE DESCRIPTION	This algebra-based physics course is intended for those majoring in the life sciences and others for whom basic knowledge of physics is helpful or desired.
LEARNING GOALS	<p>This course addresses the General education program (GEP)'s functional competency Scientific and Quantitative Reasoning. It has been approved to meet the GEP Sciences distribution requirement. In particular, it addresses the following two competencies:</p> <ul style="list-style-type: none">• Understand and use mathematical and scientific methods of inquiry, reasoning, processes, and strategies to investigate and solve problems.• Organize, interpret, draw inferences, and make predictions about natural or behavioral phenomena using mathematical and scientific models and theories. <p>By the end of this semester, students should be able to demonstrate the following abilities:</p> <ol style="list-style-type: none">1. Qualitatively and quantitatively reason with definitions of distance, displacement, speed, velocity, and acceleration.2. Create and interpret graphs of position vs. time, velocity vs. time, and acceleration vs. time.3. Solve problems related to one-dimensional and two-dimensional motion.4. Identify forces and draw free-body diagrams, calculate components and vector sums of forces.5. Apply Newton's laws of motion to solve problems involving conservative and non-conservative forces and motion.6. Apply equilibrium conditions to extended objects to determine unknown forces and torques.7. Apply conservation of energy to solve problems involving energy transfers and transformations for a system.8. Apply the first law of thermodynamics and the ideal gas law to solve problems relating to thermal processes for ideal gases.9. Apply properties of fluid pressure and Archimedes' principle to solve problems relating to buoyancy.
PREREQUISITE	High school mathematics, including trigonometry, or MATH 150.
INSTRUCTOR	<p>Dr. Lili Cui lili@umbc.edu <u>Office hour:</u> Mon 1-1:50 pm, Tue 5-5:50 pm, Wed 11-11:50 am, and Thu 2-2:50 pm Online, NO appointment is needed – just stop by.</p> <p><u>Email policy:</u></p> <ul style="list-style-type: none">• Visiting my office hour is the best way of contact. The time is set aside for you and you will get individual attention. I'd love to use the time to know you in person.• Physics related questions should be posted on the <i>Blackboard Discussion Board</i> instead of personal email so everyone in class can benefit from the discussion.• Email is a great method for non-physics questions. Please include your full name, course number, and use your UMBC email address to ensure prompt response.
REQUIRED COURSE MATERIAL	<ul style="list-style-type: none">• A reliable computer and Internet access• College Physics: A Strategic Approach by Knight, Jones, and Field, 4th ed.• MasteringPhysics (electronic homework assignments)• A clear and focused mind, positive attitude, and patience

SUCCESS STRATEGY

- Be sure you have the time required for the course. You are expected to attend all classes – lectures and labs. In addition, experience shows that success requires at least 8 hours of intensive effort outside of class each week. If you typically spend much less than 8 hours of outside study, you are unlikely to be able to learn the material. If you typically spend much more than 12 hours of outside study, you should consult with the instructor about ways to study more efficiently.
- Physics is about understanding, not memorization. Instead of only paying attention to results, it is more important to understand how you get results.
- You have many resources including the textbook, study group, your friends, Teaching Assistants, me, YouTube and more. Use them wisely.
- It is essential to develop an ability to think and learn for yourself. You must be actively engaged to learn the material, you cannot passively watch me or your classmates and expect to understand the concepts and develop problem solving skills. Cognitive science has proven that the mind must interact to learn.

Success in the course is not “a piece of cake”, but can be achieved with effort and the right study strategies.

GRADING POLICY

Type of Assignment	Percentage
Reading Quiz	5%
Daily Check-in Test	10%
Homework	10%
Lab	10%
Weekly Quiz	55%
Final Exam	10%
Total	100%

I do not grade on a curve. Why should I assume that x% of you will be failing this course? If you all do an excellent job, you all deserve an A. How well your neighbor is doing should not affect your grade. Help each other and learn from each other.

90.0% or Above	A
80.0% - 89.9%	B
70.0% - 79.9%	C
60.0% - 69.9%	D
59.9% or Below	F

- There is NO extra credit at the end of the term. It is far easier to fix problems early in the semester than after the tests have been taken.
- Check your grades on Blackboard routinely. Please contact me or your TA for any grading questions within TWO day after grade is available.

READING QUIZ

- You are required to read the textbook sections (see schedule) prior to every class; it makes for efficient learning. The class time will be spent on clarifying and applying the materials.
- Weekly reading quizzes will be assigned online through Blackboard. They typically consist of 5-10 questions, and usually due before each Monday’s class at 10:30 am.

LECTURE

- Lectures focus on deepening your understanding of the more difficult concepts and developing scientific reasoning and systematic problem solving skills, not on delivering the basic content.
- Lectures on Mondays and Wednesdays will be asynchronous. Lecture notes and video recordings will be posted in Blackboard the day before.
- Daily check-in tests are due at 11:59 pm on Mondays and Wednesdays in Blackboard.

LAB

- You must attend the lab section that you are officially registered for.
- Lab are synchronous and will be done online via Blackboard Collaborate.
- Lab is based on small-group work, it's designed to provide you with a collaborative learning environment so you can help and learn from each other.
- Lab grade will be divided equally between your full attendance and submitted work. Lab work will not be accepted if you miss the lab.
- Your lab TA will give specific guidelines.

HOMEWORK

- A major part of what I expect you to learn in this class will come as a result of doing homework. The homework assignments are designed primarily to build conceptual understanding, develop scientific reasoning skills, and provide practice and feedback with systematic problem solving. You need to fully *understand* how to solve the assigned homework problems to do well on the exams and to succeed in the course.
- Individual homework will be submitted via the MasteringPhysics online system.
- Homework questions are not easy and you will find yourself spend a lot of time on them. This is expected. Don't put off assignments until the night before they are due. Instead start your homework early enough so you have time to get help.
- You are encouraged to work together, however, you must fully understand how to solve problems on your own.
- Since the main purpose of homework is to prepare you for the exams, keep a careful written record of your work for future studying.
- There are websites where you can view (or perhaps purchase) solutions to homework problems. I cannot stop you from cheating, but I strongly recommend you don't. *Consider your goals...are you trying to just get the homework done or do you actually want to learn something?* I guarantee that the more you use solutions written by someone else, the less likely you will be able to produce your own solutions on quizzes and exams.

Quiz

- You have to do well on all quizzes to be able to get a good grade for the course. The reading quizzes, lectures, lab activities, and homework will help you acquire the understanding and problem-solving skills you'll need.
- Weekly quizzes will be given on Fridays during the class time 11:00-11:50 am, online in Blackboard.
- Quizzes are cumulative.
- Quizzes are individual work and academic integrity will be enforced. They are open book and open note, but you cannot talk to anyone nor access Internet. No cell phones or other communication devices.

FINAL EXAM

- Final exam will be cumulative.
- There is no make-up exam for the final and no one will be allowed to take the final at a different time.

MAKE UP POLICY

Life is full of surprises so it's understandable that you might miss an assignment due to an unexpected situation (like lost power or internet). The course policy has been set up to accommodate a few unexpected situations.

- Reading Quiz: Start early on reading quizzes, no late quizzes are possible.
- Lecture follow-up Test: Lowest two test scores will be dropped. These count towards ALL problems with technology.
- Friday Quiz: Lowest two Friday quiz scores will be dropped. These count towards ALL problems with technology.
- MasteringPhysics homework: It's better late than never: Possible credit for each item drops steadily to 50% after 48 hours and stays there until the last day of class on December 8.
- Lab: Makeup lab is scheduled at week 15 during your regular lab time, see schedule. Permission is required to attend the makeup lab. You need to contact your TA if you miss a lab as soon as possible.

If you must miss an assignment due to legitimate reasons*, contact me as soon as possible. **Legitimate reasons: officially-sanctioned UMBC activities, illness, family emergency, detention by authorities, or another insurmountable difficulty.*

WHERE TO GET HELP

In addition to my office hours, please take advantage of the following FREE resources if you need any help.

- Teaching Assistants will provide office hours via Blackboard Collaborate on the following dates; NO appointment is needed – just stop by.
 - 6-9 pm on Mondays, Tuesday, Wednesdays, and Thursday
 - 9-11 am on Fridays
- SI PASS sessions are available for this class, on the following dates; NO appointment is needed – just stop by. <https://si.lrc.umbc.edu/>
 - 11:00-11:50 am on Mondays and 5:00-5:50 pm on Thursdays
- The Academic Success Center also supplies free tutoring service for this class by appointment. To make an appointment, please visit <https://lrc.umbc.edu/tutor/>

ACADEMIC INTEGRITY

- Academic integrity is an important value at UMBC. By enrolling in this course, each student assumes the responsibilities of an active participant in UMBC's scholarly community in which everyone's academic work and behavior are held to the highest standards of honesty. Cheating, fabrication, plagiarism, and helping others to commit these acts are all forms of academic dishonesty, and they are wrong. Academic misconduct could result in disciplinary action that may include, but is not limited to, suspension or dismissal. These principles and policies apply in both face-to-face and online classes. Resources for students about academic integrity at UMBC are available at <https://academicconduct.umbc.edu/resources-for-students/>.
- ALL incidents of alleged Academic Misconduct will be reported.

DISABILITIES

If you have any condition such as a physical learning disability, which will make it difficult for you to carry out the work as I have outlined or which will require academic accommodations, please notify me in the first week of the course.

COURSE WEBSITE

I will put most of my teaching materials in our course site through Blackboard. After log in myUMBC, click on the “Blackboard” tab and then click on “PHYS111 - FA2020” in the “My Courses” area. You are responsible for all content delivered via Blackboard. You are *required* to logon to the course website *at least once between lectures*.

You will use the website for:

- Checking the *Announcements*.
- Accessing *Course Materials*: syllabus, reading quiz, lectures note, lab, and etc.
- Checking the *Grades* that you have earned.
- Interacting with the instructor and others online using *Discussion Board*.

PHYS 111 – Fall 2020 Schedule

	Date	Lecture Topic	Textbook	Lab
Week 1	Aug 28 (F)	*Orientation* - sync meeting in Bb Collaborate		No Lab
Week 2	Aug 31 (M)	Position and velocity	1.1-1.7	Lab #1 The Moving Man
	Sep 01 (W)	Acceleration	2.1-2.4	
	Sep 03 (F)	Quiz 1 (cumulative) 11:00-11:50 AM		
Week 3	Sep 07 (M)	NO CLASS (Labor Day)		No Lab
	Sep 09 (W)	1D motion	2.5-2.6	
	Sep 11 (F)	Free fall	2.7	
Week 4	Sept 14 (M)	Vector	3.1-3.4	Lab #2 1D & 2D Kinematics
	Sept 16 (W)	Projectile motion	3.5-3.6	
	Sept 18 (F)	Quiz 2 (cumulative) 11:00-11:50 AM		
Week 5	Sep 21 (M)	Newton's laws	4.1-4.7	Lab #3 Newton's Laws
	Sep 23 (W)	Applying Newton's laws	5.1-5.4	
	Sep 25 (F)	Quiz 3 (cumulative) 11:00-11:50 AM		
Week 6	Sep 28 (M)	Friction	5.5	Lab #4 Newton's Laws Application
	Sep 30 (W)	Interacting Objects	5.6-5.7	
	Oct 02 (F)	Quiz 4 (cumulative) 11:00-11:50 AM		
Week 7	Oct 05 (M)	Kinematics of Circular motion	3.7, 6.1	Lab #5 More on Newton's Laws Application
	Oct 07 (W)	Dynamics of Circular motion	6.2-6.4	
	Oct 09 (F)	Quiz 5 (cumulative) 11:00-11:50 AM		
Week 8	Oct 12 (M)	Torque	7.3-7.4	Lab #6 Torque and Static Equilibrium
	Oct 14 (W)	Static Equilibrium	8.1,8.5	
	Oct 16 (F)	Quiz 6 (cumulative) 11:00-11:50 AM		
Week 9	Oct 19 (M)	Springs and elasticity	8.3	Lab #7 Springs
	Oct 21 (W)	Young's modulus	8.4	
	Oct 23 (F)	Quiz 7 (cumulative) 11:00-11:50 AM		
Week 10	Oct 26 (M)	Work	10.1-10.2	Lab #8 Work and Energy
	Oct 28 (W)	Kinetic and potential energy	10.3-10.4	
	Oct 30 (F)	Quiz 8 (cumulative) 11:00-11:50 AM		
Week 11	Nov 02 (M)	Thermal energy	10.5	Lab #9 Conservation of energy
	Nov 04 (W)	Conservation of energy	10.6-10.7	
	Nov 06 (F)	Quiz 9 (cumulative) 11:00-11:50 AM		
Week 12	Nov 09 (M)	Power	10.10	Lab #10 Power
	Nov 11 (W)	Metabolic energy	11.1-11.2	
	Nov 13 (F)	Quiz 10 (cumulative) 11:00-11:50 AM		
Week 13	Nov 16 (M)	Ideal gas law and pV diagram	12.3	Lab #11 Ideal-Gas Processes
	Nov 18 (W)	First law of thermodynamics	11.3-11.4	
	Nov 20 (F)	Quiz 11 (cumulative) 11:00-11:50 AM		
Week 14	Nov 23 (M)	Thermal Energy and Work	12.3	No Lab
	Nov 25 (W)	Heat and specific heat	12.5, 12.7	
	Nov 27 (F)	NO CLASS (Thanksgiving)		
Week 15	Nov 30 (M)	Pressure	13.1-13.2	Makeup Lab
	Dec 02 (W)	Buoyance	13.3	
	Dec 04 (F)	Quiz 12 (cumulative) 11:00-11:50 AM		
Week 16	Dec 07 (M)	Summary		No lab
Final	Dec 11 (F)	Final Exam (cumulative) 10:30 AM - 12:30 PM
